English	Free	Mostly free but some at cost for all modules as you need to take the course
3.1 Patient safety in professional education and training	HO Open School Patient Safety Curriculum	<a href="http://www.patientsafetycanada.ca/en/about-us">http://www.patientsafetycanada.ca/en/about-us</a>	Curriculum	HO	The HO Open School Patient Safety Curriculum contains multimedia resources about patient safety. It explores Foundational competencies like human factors science, risk mitigation, and teamwork	English	Enrollment: 139 dollars, premium member: 150 dollars, premium member: 500 dollars	
3.1 Patient safety in professional education and training	Quality Improvement and Patient Safety Competencies Across the Learning Continuum	<a href="https://www.patientsafetycanada.ca/en/about-us">https://www.patientsafetycanada.ca/en/about-us</a>	Framework	Association of American Medical Colleges	The new and Emerging Areas in Medicine Series focuses on competencies across the undergraduate, graduate, and continuing medical education continuum. This document includes an introduction to competency-based education of the first of competence, and the context for focusing on quality improvement and patient safety. These cross-curriculum competencies are intended to help educators design and deliver curricula and related activities and to help learners in their individual practice, professional development efforts.	English	Free	
3.1 Patient safety in professional education and training	Report on the integration of the safety competencies framework into health professions education programs in Canada	<a href="https://www.patientsafetycanada.ca/en/about-us">https://www.patientsafetycanada.ca/en/about-us</a>	Framework	Canadian Patient Safety Institute	The Safety Competencies Framework was created by the CPMI in order to encourage faculties and schools to develop curricula based on a set of nationally accepted competencies focusing on patient safety. This report reviews the integration of the framework in order to support the framework's revision.	English	Free	
3.1 Patient safety in professional education and training	WHO patient safety curriculum guide for medical schools	<a href="https://www.who.int/publications-detail/who-patient-safety-curriculum-guide-for-medical-schools">https://www.who.int/publications-detail/who-patient-safety-curriculum-guide-for-medical-schools</a>	Guidance	WHO	The Curriculum Guide is a comprehensive programme for implementation of patient safety education in medical schools worldwide. It comprises two parts. Part A is a teacher's guide, which has been designed to assist teachers to implement the Curriculum Guide. This says the foundations for capacity building in patient safety education and Part B provides a comprehensive, ready-to-use, topic-based patient safety programme that can be implemented either as a whole or on a per topic basis.	English, Chinese, Indian, Czech, Italian, Korean, Portuguese, Polish, Russian, German, English	Free	
3.1 Patient safety in professional education and training	WHO patient safety curriculum guide: multi-professional edition	<a href="https://www.who.int/publications-detail/who-patient-safety-curriculum-guide-multi-professional-edition">https://www.who.int/publications-detail/who-patient-safety-curriculum-guide-multi-professional-edition</a>	Guidance	WHO	The Multi-professional Patient Safety Curriculum Guide (2015) was developed as a basis in the teaching of patient safety in universities and schools in the fields of dentistry, medicine, midwifery, nursing and pharmacy. It also supports the on-going training of all health care professionals.	English	Free	
3.1 Patient safety in professional education and training	Education, training and development	<a href="https://www.english.nhs.uk/impatienttransformation">https://www.english.nhs.uk/impatienttransformation</a>	Handbook	NHS	The patient's handbook for patient safety transformation programme. Section on education, training and development which discusses both patient safety and staff development and how to implement a national curriculum.	English	Free	4.1
3.1 Patient safety in professional education and training	Patient Safety Specialization	<a href="https://www.coursera.org/specializations/patient-safety">https://www.coursera.org/specializations/patient-safety</a>	Online course	Johns Hopkins	The Patient Safety & Quality Leadership Specialization covers the concepts and methodologies used in process improvement within healthcare. Successful participants will develop a system's view of safety and quality challenges and will learn strategies for managing change and managing risk.	English	Free	
3.1 Patient safety in professional education and training	Patient Safety in Medical, Nursing, and Other Clinical Education	<a href="https://www.patientsafetycanada.ca/en/about-us">https://www.patientsafetycanada.ca/en/about-us</a>	Perspective	Patient Safety Network	This essay reviews teaching considerations from recent research that institutions may implement to enhance incorporation of patient safety in medical and nursing education. They provide recommendations for future patient safety curricula and how to integrate them into this curriculum.	English	Free	
3.1 Patient safety in professional education and training	Commission on Education and Training for Patient Safety Progress report	<a href="https://www.patientsafetycanada.ca/en/about-us">https://www.patientsafetycanada.ca/en/about-us</a>	Progress report	HEE	Since the publication of the Commission on Education and Training for Patient Safety report in March 2016, Health Education England (HEE) has worked in collaboration with system partners and providers to introduce and embed the new Commission and safety and evidence based recommendations for improving the education and training of health professionals to deliver safe, defined, compassionate services.	English	Free	
3.1 Patient safety in professional education and training	Evaluation of Education and Training Interventions for Patient Safety	<a href="https://www.patientsafetycanada.ca/en/about-us">https://www.patientsafetycanada.ca/en/about-us</a>	Report	Centre for Health Policy at Imperial College London	HEE set up a task force of "Integrating Clinical Training Interventions for Patient Safety" to identify how education and training can help deliver safe, whole care. Patient Safety for Health Professionals was identified as an academic partner. This report summarizes a literature review for evidence on what works in education and training and sets out a taxonomy of current patient safety, staff training, medical and patient safety.	English	Free	
3.1 Patient safety in professional education and training	First, do no harm: Understanding patient safety teaching in undergraduate medical education	<a href="https://www.patientsafetycanada.ca/en/about-us">https://www.patientsafetycanada.ca/en/about-us</a>	Report	GMAC & Medical Schools Council	This report highlights and reinforces the commitment from medical schools in the UK to the patient safety. It highlights examples of medical school initiatives as well as patient safety projects from medical students and doctors in training. It also provides an action plan for medical schools to improve patient safety.	English	Free	
3.1 Patient safety in professional education and training	Health Education England: Supporting Patient Safety Through Education and Training	<a href="https://www.patientsafetycanada.ca/en/about-us">https://www.patientsafetycanada.ca/en/about-us</a>	Report	HEE	This report describes how HEE supports the implementation of patient safety education and describes how this can be most effectively delivered. In this Annex it provides examples of patient safety education programmes.	English	Free	
3.1 Patient safety in professional education and training	Unmet Needs: Teaching Physicians to Provide Safe Patient Care	<a href="https://www.patientsafetycanada.ca/en/about-us">https://www.patientsafetycanada.ca/en/about-us</a>	Report	Simon Leake Institute	Unmet Needs is the culmination of three L1 roundtable discussions and makes key recommendations for reforming medical education in order to prepare patient safety.	English	Free	
3.1 Patient safety in professional education and training	Quality Specialist Certificates	<a href="https://www.patientsafetycanada.ca/en/about-us">https://www.patientsafetycanada.ca/en/about-us</a>	Specialist Certificates	International Society for Quality in Health Care	ISO Specialist Certificates are specifically designed for dedicated healthcare professionals. They provide opportunities for personal learning and implementing healthcare improvement.	English	Free	
3.1 Patient safety in professional education and training	Promoting excellence: Standards for medical education and training	<a href="https://www.patientsafetycanada.ca/en/about-us">https://www.patientsafetycanada.ca/en/about-us</a>	Standards	GMAC	Promoting excellence: standards for medical education and training sets out the standards that we expect universities responsible for educating and training medical students and doctors in the UK to meet. Patient safety is at the core of these standards.	English	Free	
3.1 Patient safety in professional education and training	National patient safety syllabus 2.0: Training for all health staff	<a href="https://www.patientsafetycanada.ca/en/about-us">https://www.patientsafetycanada.ca/en/about-us</a>	Syllabus	Academy of Medical Royal Colleges	The syllabus is designed for all NHS staff and is structured to provide a technical understanding of safety in complex systems and a suite of tools and approaches that will: <ul style="list-style-type: none"> <li>Build safety for patients</li> <li>Reduce the risks created by systems and practices</li> <li>Develop a genuine culture of patient safety</li> </ul>	English	Free	
3.1 Patient safety in professional education and training	Textbook of Patient Safety and Clinical Risk Management	<a href="https://www.patientsafetycanada.ca/en/about-us">https://www.patientsafetycanada.ca/en/about-us</a>	Textbook	Springer	Healthcare professionals must acquire proficiency in producing evidence that can be used for making improvements to patient safety and managing the risks of adverse events. In this textbook, definitions of terms and concepts will be the content of the first section of the text. The second section will then cover current practice regarding patient safety and a greater number of valuable clinical guidelines are needed. The third section will then cover patient safety and lessons to be learned from the past.	English	Free	2.4
3.1 Patient safety in professional education and training	HEE Patient Training Catalog	<a href="https://www.patientsafetycanada.ca/en/about-us">https://www.patientsafetycanada.ca/en/about-us</a>	Training Catalog	Agency for Healthcare Research and Quality	The HEE Patient Training Catalog is a way to use resources for healthcare professionals across all settings of care and specialties looking for education opportunities to better their knowledge of patient safety practices and principles. Some training opportunities are available in-person meetings while others are conducted via live or archived webinars. Opportunities are updated on a monthly basis and can be searched by critical facts such as location, time, fee, and CME/ACCU availability.	English	Free	
3.1 Patient safety in professional education and training	Courses (OHG)	<a href="https://www.patientsafetycanada.ca/en/about-us">https://www.patientsafetycanada.ca/en/about-us</a>	Training courses	Clinical Human Factors Group	Collection of training courses from the OHG.	English	Free	
3.2 Centres of excellence for patient safety education and training	Quality and Safety in Healthcare	<a href="https://www.patientsafetycanada.ca/en/about-us">https://www.patientsafetycanada.ca/en/about-us</a>	Course	Imperial University	On our MSc, you will learn the practice of theories of healthcare quality and patient safety from our academics, who are leading world class research in this area, and from experts in quality and patient safety. Among the topics covered are the quality improvement methods, the influence on patient safety, methods and knowledge in the discipline of ergonomics and human factors, and the use of data for quality improvement and patient safety. You will also be supported to develop key transferable skills in critical appraisal, academic writing, project management and communication.	English	9,250 pounds for UK/EU, 21,155 pounds for international	
3.2 Centres of excellence for patient safety education and training	PGCert in Patient Safety	<a href="https://www.patientsafetycanada.ca/en/about-us">https://www.patientsafetycanada.ca/en/about-us</a>	Course	Oxford University	The MSc in Patient Safety is designed to provide an understanding of: <ul style="list-style-type: none"> <li>The basic science behind quality improvement methods</li> <li>The techniques for implementing, sustaining and measuring systems change</li> <li>The techniques for exploring and evaluating the effect of different approaches to improving safety in healthcare.</li> </ul>	English	1,650 annual course fee for home students, 7,850 pounds annual course fee for overseas	
3.2 Centres of excellence for patient safety education and training	Quality and Patient Safety Improvement	<a href="https://www.patientsafetycanada.ca/en/about-us">https://www.patientsafetycanada.ca/en/about-us</a>	Course	University of Nottingham	This unique degree programme develops your expertise in patient safety, human factors and quality improvement and how this applies to practice. You will benefit from a strong practical element, as each module delivers a mix of classroom-based teaching and access to a comprehensive suite of online learning resources, designed by our award winning a learning group. Our programme is designed to be an interdisciplinary collaboration, involving leading academics in health care, business and human factors.	English	yet to be determined	

5.1 Safe working environment for health workers	Workplace violence in the health sector	<a href="https://doi.org/10.1891/1567-5800.19.1.1">https://doi.org/10.1891/1567-5800.19.1.1</a>	Case Studies	WHO, International Labour Office, International Council of Nurses, Public Services International	ICN, ICN, WHO and PSI launched a joint programme on workplace violence in the health sector in the year 2000 with the aim to fill major information gaps and to develop guidance materials for the development of policies addressing violence at work. Besides several cross-cutting studies, the programme initiated country case studies in Brazil, Bulgaria, Lebanon, Portugal, South Africa and Thailand. The present report synthesises the main findings from those country reports, indicating results of a consensus international research.	English	Free	
5.1 Safe working environment for health workers	Character: Workforce safety: a priority for patient safety	<a href="https://www.who.int/news-room/fact-sheets/detail/workforce-safety">https://www.who.int/news-room/fact-sheets/detail/workforce-safety</a>	Charter	WHO	This Charter is published by the World Health Organization (WHO) on the occasion of the World Patient Safety Day, 17 September 2020, which is dedicated to the theme "Health worker safety". It aims to ensure that all health workers are valued and visible stakeholders are invited to support and endorse this Charter by signing up to it.	English	Free	
5.1 Safe working environment for health workers	Fatigue and Patient Safety	<a href="https://www.pain-europe.eu/article/view/10046">https://www.pain-europe.eu/article/view/10046</a>	Committee Guidance	American College of Obstetrics and Gynecologists' Committee on Patient Safety and Quality	This publication identifies the dangers of fatigue for patient safety and suggest recommendations for how healthcare professionals can promote guidelines to facilitate about working hours in the workplace.	English	Free	
5.1 Safe working environment for health workers	Mental health and well-being at the workplace – protection and inclusion in challenging times	<a href="https://publik.eur.nl/europe/article/view/102111">https://publik.eur.nl/europe/article/view/102111</a>	Conference report	WHO Regional Office for Europe	This commitment is based on the presentations given at the Conference on Mental Health and Well-being at the Workplace – Protection and Inclusion in Challenging Times in Berlin, Germany, on 27 and 28 March 2020, held by the European Union. It discussed ways to respond to how modern working life challenges mental health and wellbeing, how to overcome barriers to employment for people with mental health problems and opportunities for integration and empowerment given the global economic downturn.	English	Free	
5.1 Safe working environment for health workers	HR Framework for Improving Job in Work	<a href="http://www.hi.eu/en/publications/hr-framework-for-improving-job-in-work">http://www.hi.eu/en/publications/hr-framework-for-improving-job-in-work</a>	Framework	HI	This white paper is intended to serve as a guide for health care organisations to engage in a participative process where leaders and colleagues at all levels of the organisation, "What matters to you?" – enabling them to better understand the barriers to job in work, and co-create meaningful, long-term strategies to address these issues.
