

Title: Tools & Resources Mapped to Strategic Objective 5 of the WHO Global Patient Safety Action Plan 2021-2030
File Name: GKPSLINKA05-20232406

S. Health worker education, skills and safety	Name	Link	Type of resource	Source	Description	Language	Cost	Interlinking areas
5.1 Patient safety in professional education and training	Patient Safety Education Plan	https://www.patient-safety-education.ca/en/About-Us	Action Plan	Canadian Patient Safety Institute	An action plan for patient safety and QIP Education to lay the foundation of a national patient safety education network.	English	Free	
5.1 Patient safety in professional education and training	Patient Safety Education Program - Canada Curriculum	https://www.patient-safety-education.ca/en/About-Us	Curriculum	Canadian Patient Safety Institute	Canada curriculum, originally developed by international patient safety experts and customized by Canadian patient safety experts for Canadian healthcare providers, is a living curriculum that is regularly reviewed, revised, updated, and expanded.	English	Mostly free but comes at cost for all modules as you need to take the course	
5.1 Patient safety in professional education and training	HO Open School Patient Safety Curriculum	https://www.ho-open-school.ca/en/About-Us	Curriculum	HO	The HO Open School Patient Safety Curriculum contains multimedia resources about patient safety. It explores foundational concepts like human factors science, risk mitigation, and teamwork.	English	Enrollment: 139 dollars, premium member: 150 dollars, premium member: 100 dollars	
5.1 Patient safety in professional education and training	Quality Improvement and Patient Safety Competencies Across the Learning Continuum	https://www.ama-assn.org/speicalty/quality-improvement	Framework	Association of American Medical Colleges	The new and Emerging Areas in Medicine Series frames competencies across the undergraduate, graduate, and continuing medical education continuum. This document includes an introduction to competency-based education of the first set of competencies, and the center for focusing on quality improvement and patient safety. These cross-continuum competencies are intended to help educators design and deliver curricula and related activities and to help learners in their individual QPS professional development efforts. 202	English	Free	
5.1 Patient safety in professional education and training	Report on the integration of the safety competency framework into health professions education programs in Canada	https://www.patient-safety-education.ca/en/About-Us	Framework	Canadian Patient Safety Institute	The Safety Competency Framework was created by the CPSI in order to encourage faculties and schools to develop curricula based on the set of nationally validated competencies focusing on patient safety. This report reviews the integration of the Framework in order to support the Frameworks revision.	English	Free	
5.1 Patient safety in professional education and training	WHO patient safety curriculum guide for medical schools	https://www.who.int/publications-detail/who-patient-safety-curriculum-guide-for-medical-schools	Guidance	WHO	The Curriculum Guide is a comprehensive programme for implementation of patient safety education in medical schools worldwide. It comprises two parts: Part A is a teacher's guide, which has been designed to assist teachers to implement the Curriculum Guide. This lays the foundations for capacity-building in patient safety education and Part B provides a comprehensive, ready-to-teach, topic-based patient safety programme that can be implemented either as a whole or on a part topic basis.	English	Free	
5.1 Patient safety in professional education and training	WHO patient safety curriculum guide: multi-professional edition	https://www.who.int/publications-detail/who-patient-safety-curriculum-guide-for-multi-professional-edition	Guidance	WHO	The Multi-professional Patient Safety Curriculum Guide (2021) was developed to assist in the teaching of patient safety in universities and schools in the fields of dentistry, medicine, midwifery, nursing and pharmacy. It also supports the on-going training of all health care professionals.	Japanese, Chinese, Czech, Italian, Indonesian, Portuguese, Polish, Korean, German, English	Free	
5.1 Patient safety in professional education and training	Education, training and development	https://www.ama-assn.org/speicalty/education-training-development	Framework	AMA	The nation's handbook for mastery transformation programme. Section on education, training and development which discusses both self-development and staff development and how to implement personalized care.	English	Free	4.2
5.1 Patient safety in professional education and training	Patient Safety Specialisation	https://www.ama-assn.org/speicalty/patient-safety-specialisation	Online course	Johns Hopkins	The Patient Safety & Quality Leadership Specialisation develops the concepts and methodologies used in process improvement within healthcare. Successful participants will develop a system's view of safety and quality challenges and will learn strategies for improving culture, enhancing teamwork, managing change and monitoring outcomes.	English	Free	
5.1 Patient safety in professional education and training	Patient Safety in Medical, Nursing, and Other Clinical Education	https://www.ama-assn.org/speicalty/patient-safety-in-medical-nursing-and-other-clinical-education	Perspective	Patient Safety Network	This essay reviews teaching considerations from recent research that institutions may implement to enhance incorporation of patient safety in medical and nursing education. They provide recommendations for future patient safety concepts and how to incorporate them into the curriculum.	English	Free	
5.1 Patient safety in professional education and training	Commission on Education and Training for Patient Safety Progress Report	https://www.hhs.gov/ohrt/patient-safety-report	Progress report	HEE	Since the publication of the Commission on Education and Training for Patient Safety report in March 2020, Health Education England (HEE) has worked in collaboration with system partners and providers to introduce and embed the work of the Commission and a suite of evidence-based recommendations for improving the education and training of health professionals to deliver safe, effective, compassionate person-centred care.	English	Free	
5.1 Patient safety in professional education and training	Evaluation of Education and Training Interventions for Patient Safety	https://www.ama-assn.org/speicalty/evaluation-of-education-and-training-interventions-for-patient-safety	Report	Centre for Health Policy at Imperial College London	HEE set out to take stock of 'what works' in curriculum and training interventions for patient safety to identify how education and training can help deliver safe care. Imperial College Centre for Health Policy, was identified as an academic partner. This report summarizes a literature review for evidence on education and training as well as a summary of conversations with safety, quality, medical students and UBLs.	English	Free	
5.1 Patient safety in professional education and training	First, do no harm: Enhancing patient safety teaching in undergraduate medical education	https://www.ama-assn.org/speicalty/first-do-no-harm-enhancing-patient-safety-teaching-in-undergraduate-medical-education	Report	GMAC & Medical Schools Council	This report highlights and reinforces the commitment from medical schools in the UK to each patient safety. It highlights examples of medical school initiatives as well as patient safety projects from medical students and doctors in training. It also provides areas where future work needs to be undertaken.	English	Free	
5.1 Patient safety in professional education and training	Health Education England's Supporting Patient Safety Through Education and Training	https://www.hee.nhs.uk/our-work/education-and-training	Report	HEE	This report describes how HEE supports the implementation of patient safety into education and describes how this can be most effectively delivered. In this Annex it provides examples of patient safety education programmes.	English	Free	
5.1 Patient safety in professional education and training	Unmet Needs: Teaching Physicians to Provide Safe Patient Care	https://www.hhs.gov/ohrt/patient-safety-report	Report	Imperial College London	Unmet Needs is the culmination of three UK roundtable discussions and makes key recommendations for reforming medical education in order to improve patient safety.	English	Free	
5.1 Patient safety in professional education and training	Report 1 Contemporary Issues in Medicine: Education in Safe and Effective Prescribing Practices	https://www.ama-assn.org/speicalty/contemporary-issues-in-medicine-education-in-safe-and-effective-prescribing-practices	Report/Framework	Association of American Medical Colleges	The goal of the Medical School Objectives Project initiative has been to enhance the relevance and thereby improve the quality of medical student education. The tables within the report contain the broad educational objectives which, in an ideal curriculum, would be taught and evaluated at each medical school to prepare all graduates to be thoughtful, effective, and safe prescribers by the time they are residents.	English	Free	3.2
5.1 Patient safety in professional education and training	Report 2 Contemporary Issues in Medicine: Quality of Care	https://www.ama-assn.org/speicalty/contemporary-issues-in-medicine-quality-of-care	Report/Framework	Association of American Medical Colleges	The panel's charge was to consider the issue of quality improvement education within the context of undergraduate medical education by asking three fundamental questions: What should medical school students learn about quality of care (beyond learning objectives)?	English	Free	
5.1 Patient safety in professional education and training	SGSAC Specialist Certificates	https://www.sgac.ac.uk/education/specialist-certificates	Specialist Certificates	International Society for Quality in Health Care	Specialist Certificates are specifically designed for dedicated healthcare professionals. They provide ultimate focus in personal learning and in implementing healthcare improvement.	English	Cost between 125-350 euros according to membership	
5.1 Patient safety in professional education and training	Promoting excellence: Standards for medical education and training	https://www.gmc-uk.org/standards-for-medical-education-and-training	Standards	GMAC	Promoting excellence: standards for medical education and training sets out ten standards that we expect organisations responsible for educating and training medical students and doctors in the UK to meet. Patient safety is at the core of these standards.	English	Free	
5.1 Patient safety in professional education and training	National patient safety syllabus 2.0: Training for all NHS staff	https://www.npsa.nhs.uk/our-work/national-patient-safety-syllabus-20	Syllabus	Academy of Medical Royal Colleges	The syllabus is designed for all NHS staff and is structured to provide both a technical understanding of safety in complex systems and a suite of skills and approaches that will: - Build safety for patients - Reduce the risks created by systems and practices - Develop a genuine culture of patient safety	English	Free	
5.1 Patient safety in professional education and training	Textbook of Patient Safety and Clinical Risk Management	https://www.springer.com/book/9781299778310	Textbook	Springer	Healthcare professionals must acquire proficiency in producing evidence that can be used for making improvements to patient's safety and managing the risks of adverse events. In this textbook, definitions of terms and concepts will be the content of the first section of this chapter. The second section will show the current picture regarding patient safety and why a greater number of valuable clinical problems are needed. The third section will then consider possible solutions and lessons to apply in practice.	English	Free	2.4
5.1 Patient safety in professional education and training	AHRQ Patient Training Catalog	https://ahrq.org/education/patient-training-catalog	Training Catalog	Agency for Healthcare Research and Quality	The AHRQ Patient Training Catalog is an easy-to-use resource for healthcare professionals across all settings of care and specialties looking for education opportunities to further their knowledge of patient safety practices and principles. Some training opportunities are available in-person, while others are available online. Opportunities are updated on a monthly basis and can be searched by critical factors such as event location, fee, and CE/CME availability.	English	Free	
5.1 Patient safety in professional education and training	Courses (CHQ)	https://chq.org/courses/	Training courses	Clinical Human Factors Group	Collection of training courses from the CHQ.	English	Free	
5.2 Centres of excellence for patient safety education and training	Quality and Safety in Healthcare	https://www.ama-assn.org/speicalty/quality-and-safety-in-healthcare	Course	Leicester University	On this course, you will learn the practice and theories of healthcare quality and patient safety from our academics, who are leading world-class research in this area, and from experts in quality and safety at NHS partners. Among the topics you will study are quality improvement methods, the influences on patient safety, methods and knowledge in the discipline of ergonomics and human factors, and the use of data for quality improvement and patient safety. We will also be supported to develop key transferable skills in critical appraisal, academic writing, project management and communication.	English	9,250 pounds for UK/EL, 21,555 pounds for International	
5.2 Centres of excellence for patient safety education and training	PGCert in Patient Safety	https://www.pgcert.ac.uk/education/pgcert-in-patient-safety	Course	Oxford University	The PGCert in Patient Safety is designed to provide an understanding of: The basic science behind quality improvement methods. The techniques for implementing, sustaining and measuring system change. The techniques for exploring and evaluating the effect of different approaches to improving safety in healthcare.	English	1,665 annual course fee for home, 7,820 pounds annual course fee for overseas	
5.2 Centres of excellence for patient safety education and training	MSc Healthcare Improvement and Patient Safety	https://www.dhmi.ac.uk/education/msc-healthcare-improvement-and-patient-safety	Course	Plymouth University	Healthcare systems all share one current goal: to deliver safe, high quality care within budget against a backdrop of skill shortages and increasing patient demand. Our MSc in Healthcare Improvement and Patient Safety will equip you with the confidence to address these challenges. On this programme you will develop the knowledge and expertise to analyse healthcare processes, propose evidence-based improvements and to lead improvement projects.	English	9,750 pounds for home, 16,200 pounds for international	
5.2 Centres of excellence for patient safety education and training	Quality and Patient Safety Improvement	https://www.nottingham.ac.uk/healthcare-quality-and-patient-safety	Course	University of Nottingham	This unique degree programme develops your expertise in patient safety, human factors and quality improvement and how this applies to an interdisciplinary, cross-sector, strong practical element, as each module offers a mix of classroom-based teaching and access to a range of resources, designed to give you a real-world learning group. Our programme is designed by an interdisciplinary collaboration, involving leading academics in health science, business and human factors.	English	yet to be determined	
5.2 Centres of excellence for patient safety education and training	Patient Safety	https://learning.bmi.com/learning/course-intro-patient-safety	Online course	BMI Learning	Understand the importance of patient safety and understand how errors may occur. Reduce errors and the clinicians' responsibility in ensuring patient safety. Know what changes are needed to improve patient safety. Know what the barriers are to patient safety. Understand the risks and how to best their understanding. Understand how patient involvement and open disclosure can improve the quality and safety of healthcare systems. Understand which drug and clinical settings carry particular risks. Understand the causes and frequency of drug errors and how to reduce their incidences in clinical practice.	English	BMI Subscription	
5.2 Centres of excellence for patient safety education and training	Patient Safety and Clinical Human Factors	https://www.ama-assn.org/speicalty/patient-safety-and-clinical-human-factors	Online Course	Edinburgh University	This three day, part-time online MSc programme in Patient Safety and Clinical Human Factors aims to support any graduate health care professionals - ranging from nurses to surgeons and anaesthetists - in using evidence-based tools and techniques to improve the reliability and safety of everyday health care systems and processes.	English	5,735 pounds	
5.2 Centres of excellence for patient safety education and training	MSc in Health Care Quality	https://healthcarequality.mcgill.ca/education/msc-health-care-quality	Online course	George Washington University	The Institute of Medicine of Science in Health Sciences (IMHS) in Health Care Quality was developed for health care professionals aspiring to become patient safety and quality leaders and meet the increasing demand for quality-based care.	English	35,380 dollars	
5.2 Centres of excellence for patient safety education and training	MSc in Clinical Operations and Healthcare Management	https://healthcarequality.mcgill.ca/education/msc-clinical-operations-and-healthcare-management	Online course	George Washington University	Learn what it takes to lead a health care delivery system that is clinically effective, cost-efficient, and improves overall patient care and safety. With a focus on population health, you'll learn ways to improve your own communication skills for optimal interpersonal practice, leadership skills in quality improvement, and understand the technological tools needed to conduct effective data analysis for strategic development.	English	35,380 dollars	
5.2 Centres of excellence for patient safety education and training	MSc Patient Safety	https://www.imperial.ac.uk/healthcare-quality	Online course	Imperial College London	This course is well suited for healthcare professionals, managers, policymakers and industry representatives. Our aim is to equip you with the skills to improve patient safety, considering the implications of interdisciplinary working in low resource settings, responses to global crises and delivering innovation in challenging circumstances, such as international pandemics.	English	6,300 pounds home rate, 10,400 per year for overseas	
5.2 Centres of excellence for patient safety education and training	Patient Safety Quality and Leadership	https://www.hughesmedicine.org/education/patient-safety-quality-and-leadership	Online Course	Johns Hopkins Medicine, Armstrong Institute for Patient Safety and Quality	The program's 13 modules, which can be taken anywhere and at any time, delve into core concepts in such areas as: Fostering a culture of patient safety. Delivering patient-centered care. Designing safe care delivery systems. Enhancing interdisciplinary teamwork and communication. Sustaining change. Tools and strategies for identifying and mitigating hazards.	English	400 dollars	
5.2 Centres of excellence for patient safety education and training	Transforming Healthcare Leadership and Management	https://thlm.org/course/patient-safety-and-risk-reduction	Online course	Transforming Healthcare Leadership and Management	This online programme provides comprehensive coverage of all of the knowledge and skills required by today's patient safety and risk management professionals. It explores how, in healthcare, failure human beings and complex systems interact to create a challenging safety environment. The programme also shows you, in considerable depth, how to set up effective error reporting systems and lead investigations into adverse incidents in order to learn from them and reduce the likelihood of recurrence.	English	800 pounds	
5.3 Patient safety competencies as regulatory requirements	AHRQ's Core Competencies	https://www.ahrq.gov/core-competencies	Framework	AHRQ	The AHRQ focuses on 3 core competencies: health systems research, practice improvement, data & analytics.	English	Free	
5.3 Patient safety competencies as regulatory requirements	From Science to Service: A Framework for the Transfer of Patient Safety Research to the Frontlines	https://www.ama-assn.org/speicalty/from-science-to-service-a-framework-for-the-transfer-of-patient-safety-research-to-the-frontlines	Framework	AHRQ	A conceptual framework was developed to help AHRQ's research and accelerate the transfer of research results from AHRQ's patient safety research portfolio to health care delivery. The framework can be used by the patient safety portfolio as well as individual researchers to develop plans, tools, and strategies for moving research into practice.	English	Free	
5.3 Patient safety competencies as regulatory requirements	National Patient Safety Education Framework	https://www.npsa.nhs.uk/our-work/national-patient-safety-education-framework	Framework	Australian Commission on Safety and Quality in Healthcare	The National Patient Safety Education Framework is designed to provide a simple, flexible and accessible framework that identifies the knowledge, skills, behaviours, attitudes and performance required of all health care workers in relation to patient safety.	English	Free	
5.3 Patient safety competencies as regulatory requirements	The Safety Competencies	https://www.patient-safety-education.ca/en/About-Us	Framework	Canadian Patient Safety Institute	The 2020 Safety Competencies Framework (2nd Edition) is a valuable resource to power makers, regulators and accreditors to guide system change or healthcare program. It can also be a valuable resource to policy makers, regulators and accreditors to guide system change or healthcare program.	English	Free	
5.3 Patient safety competencies as regulatory requirements	QSEN Competencies	https://www.qsen.org/competencies	Framework	Quality and Safety Education for Nurses	The overall goal for the Quality and Safety Education for Nurses (QSEN) project is to meet the challenge of preparing future nurses who will have the knowledge, skills and attitudes (KSAs) necessary to continuously improve the quality and safety of the healthcare system within which they work. Using the Institute of Medicine's competencies, QSEN Institute and National Advisory Board have defined quality and safety competencies for nursing and proposed targets for the knowledge, skills, and attitudes to be developed in nursing core courses programs for each competency.	English	Free	
5.3 Patient safety competencies as regulatory requirements	The CanMEDS 2025 Physician Competency Framework	https://www.royalcollege.ca/education/canmeds2025	Framework	The Royal College of Physicians and Surgeons of Canada	The CanMEDS framework is a competency framework, a guide to the essential abilities physicians need for optimal patient outcomes. The seven CanMEDS roles, or thematic groups of competencies, are integrated by physicians on a daily basis in practice. Each competency is made up of elements of their own, and can be broken down into smaller components for teaching, learning, observation, interaction and assessment.	English	Free	
5.3 Patient safety competencies as regulatory requirements	Development of the Core Competencies for Patient Safety Research	https://www.ama-assn.org/speicalty/development-of-the-core-competencies-for-patient-safety-research	Framework	WHO	This document describes the process to develop the core competencies for patient safety research, a process that started in early February 2008 with the setting up of the WHO Patient Safety Research Education and Training working group and ended in December 2008 with the establishment of consensus around the core competencies. These competencies were grouped into three main areas: the science of patient safety, the methodology needed to carry out patient safety research, and the knowledge translation or how to utilize research for policy change to improve patient safety.	English	Free	
5.4 Linking patient safety with appraisal system of health workers	Hand Hygiene Self-Assessment Framework (HSAF)	https://www.who.int/publications-detail/who-hand-hygiene-self-assessment-framework-hsaf	Framework	WHO	The Hand Hygiene Self-Assessment Framework is a systematic tool with which to obtain a situation analysis of hand hygiene monitoring and actions within an individual health-care facility.	English	Free	3.1, 5.5
5.4 Linking patient safety with appraisal system of health workers	IPAC Canada Core Competencies for Infection Control Professionals	https://www.ipac.ca/education/core-competencies-for-infection-control-professionals	Guidance	Canadian Patient Safety Institute	This document lists IPAC Canada's core competencies for Infection Prevention and Control Professionals (IPC) which indicate the minimum knowledge, skills and attitudes required to practice safely and ethically as an IPC. The competency statements reflect expectations that all IPCs who are able to perform effectively in the roles and functions required by his or her position and within the team and organization.	English	Free	3.3
5.4 Linking patient safety with appraisal system of health workers	A Self-Assessment Guide for Health Care Organizations	https://www.ama-assn.org/speicalty/self-assessment-guide-for-health-care-organizations	Guidance	International Finance Corporation	This Guide is designed to assist health care organizations in emerging markets to reach "international standards" of quality and patient safety. It will enable them to conduct an organizational self-assessment to identify how well they are meeting defined standards in five key areas. The Guide will help them to gauge how much effort they need to make – and in which areas – to reach international standards.	English	Free	
5.4 Linking patient safety with appraisal system of health workers	Core competencies for infection prevention and control professionals	https://www.who.int/publications-detail/core-competencies-for-infection-prevention-and-control-professionals	Guidance	WHO	The purpose of this document is to define who the IPC professional and identify what core competencies are needed to be qualified in this discipline and at what level, that is, junior versus senior. The ultimate goal of this document is to support the achievement of the specific expertise and competencies of IPC professionals needed at country and facility level.	English	Free	3.3
5.4 Linking patient safety with appraisal system of health workers	Guidelines: Incentives for Health Professionals	https://www.who.int/publications-detail/guidelines-incentives-for-health-professionals	Guidance	WHO	The development and implementation of incentive schemes in health care is an emerging field. A wide variety of measures have been implemented using financial and non-financial approaches linked to various performance outcomes and targeting a range of health care professionals. This provides an overview of these measures.	English	Free	
5.4 Linking patient safety with appraisal system of health workers	Interim Practical Manual supporting national implementation of the WHO Guidelines on Core Competencies of Infection Prevention and Control Programmes	https://www.who.int/publications-detail/interim-practical-manual-supporting-national-implementation-of-the-who-guidelines-on-core-competencies-of-infection-prevention-and-control-programmes	Manual	WHO EMRO	This practical manual is designed to support implementation of the World Health Organization (WHO) Guidelines on core competencies of infection prevention and control programmes (http://www.who.int/infection-prevention/publications/core-competencies/en) at the national level, with practical links with limited resources.	English	Free	3.1, 5.5, 7.4
5.4 Linking patient safety with appraisal system of health workers	SOPS Hospital Survey	https://www.ama-assn.org/speicalty/sops-hospital-survey	Tool	Agency for Healthcare Research and Quality	The Agency for Healthcare Research and Quality (AHRQ) and Medical Error's Workshop of the Quality Improvement Coordination Task Force (QIC) sponsored the development of the Hospital Survey on Patient Safety Culture. The hospital survey is designed specifically for hospital staff and asks for their opinions about the culture of patient safety at their hospitals.	English, Spanish	Free	6.1
5.4 Linking patient safety with appraisal system of health workers	Patient Safety Self-Assessment Tool	https://www.ama-assn.org/speicalty/patient-safety-self-assessment-tool	Tool	HI	This is a checklist of practices known to promote safe care and reduce the risk of adverse events. Hospitals can use this tool to evaluate whether they have safe care practices in place and to identify areas where they may need to implement or expand.	English	Free	
5.4 Linking patient safety with appraisal system of health workers	Ono 2.0 High Reliability Assessment	https://www.ono.com/for/healthcare/patient-safety	Tool	The Joint Commission	The Assessment consists of a series of questions for senior leaders to reflect upon and come to consensus on where they believe their organization is at today. Results of the assessment indicate the organization's level of maturity across 14 areas of performance.	English	Free	6.1
5.4 Linking patient safety with appraisal system of health workers	Patient Safety Management Systems & Standards	https://www.safesystems.org.au/education/patient-safety-management-systems-and-standards	Toolkit	Australian Commission on Safety and Quality in Healthcare	The checklist has been provided to assist members of governing bodies and their CEOs, managers/clinician managers, clinicians and patients in their understanding of the four key areas in a patient management safety system.	English	Free	
5.5 Safe working environment for health workers	Workers' Health: global plan of action	https://www.who.int/publications-detail/workers-health-global-plan-of-action	Action Plan	ILO/WHO	The goal of this Plan of Action is to strengthen the health sector's response, in coordination with other stakeholder sectors, in order to provide comprehensive workers' health services, improve work environments, increase efforts to promote workers' health, and reduce health inequalities by implementing updated policies, plans, and regulations.	English, Spanish, Portuguese, French	Free	

15	Safe working environment for health workers	World Patient Safety Day goals 2020-21	https://www.who.int/news/2020/09/16-world-patient-safety-day-goals-2020-21	Action plan	WHO	The World Patient Safety Day goal is to address health care providers and managers at the health care facility level and are formulated as the statement of best practices. Each goal is accompanied by suggested actions based on existing WHO guidance and what WHO could facilitate improvement in the focused safety practice domain. Links to available WHO resources on the subject are provided with each goal.	English	Free
16	Safe working environment for health workers	Workplace violence in the health sector	https://www.who.int/news/2019/04/04-workplace-violence-in-the-health-sector	Case Studies	WHO, International Labour Office, International Council of Nurses, Public Services International	ICO, ICN, WHO and PSI launched a joint programme on workplace violence in the health sector in the year 2000 with the aim to fill major information gaps and to develop guidance materials for the development of policies and addressing violence at work. Besides several cross-cutting theme reviews, the programme initiated country case studies in Brazil, Bulgaria, Lebanon, Portugal, South Africa and Thailand. The present report synthesises the main findings from those country reports, including results of a concurrent independent Australian review.	English	Free
17	Safe working environment for health workers	Charter: Health worker safety a priority for patient safety	https://www.who.int/news/2020/09/16-world-patient-safety-day-goals-2020-21	Charter	WHO	This Charter is presented by the World Health Organization (WHO) on the occasion of World Patient Safety Day, 17 September 2020, which is dedicated to the theme "Health worker safety: a priority for patient safety". WHO Member States and all relevant stakeholders are invited to endorse and implement this Charter for Health Workers.	English	Free
18	Safe working environment for health workers	Fatigue and Patient Safety	https://www.who.int/news/2019/04/04-workplace-violence-in-the-health-sector	Commission Opinion	American College of Obstetricians and Gynecologists' Committee on Professional Life, Work and Well-being	This committee opinion outlines the dangers of fatigue for patient safety and suggests recommendations for how healthcare organizations can improve guidelines and policies about working hours and sleep in the workplace.	English	Free
19	Safe working environment for health workers	Mental health and well-being at the workplace – protection and inclusion in challenging times	https://www.who.int/news/2020/09/16-world-patient-safety-day-goals-2020-21	Conference report	WHO Regional Office for Europe	This publication is based on the presentations given at the Conference on Mental Health and Well-being at the Workplace – Protection and Inclusion in Challenging Times in Berlin, Germany, on 17 and 18 March 2020, held by the European Union. It is discussed why we respond to how modern working life challenges mental health and wellbeing, how to overcome barriers to opportunities for people with mental health problems and opportunities for integration and empowerment given the global pandemic disruption.	English	Free
20	Safe working environment for health workers	IMI Framework for Improving Joy in Work	http://www.who.int/news/2020/09/16-world-patient-safety-day-goals-2020-21	Framework	IMI	This white paper is intended to serve as a guide for health care organizations to engage in a participative process where leaders ask colleagues at all levels of the organization, "What matters to you?" – enabling them to better understand the barriers to joy in work, and to create meaningful, high-impact strategies to address them.	English	Free
21	Safe working environment for health workers	Challenging Behaviour Strategic Framework	https://www.health.gov.au/health-research-and-services/mental-health-and-wellbeing/strategic-framework	Framework	South Australia Department of Health & Wellbeing	The Challenging Behaviour Strategic Framework provides a vision for the Department of Health and Wellbeing, the Local Health Network and SA Ambulance Services play in supporting the health workforce and providing practical, evidence-based interventions to keep people safe from harm.	English	Free
22	Safe working environment for health workers	COVID-19: Mental health & wellbeing for healthcare professionals	https://www.who.int/news/2020/09/16-world-patient-safety-day-goals-2020-21	Guidance	Academy of Medical Royal Colleges	A guidance document and resource compendium of	English	Free
23	Safe working environment for health workers	Exposure to Stress	https://www.who.int/news/2020/09/16-world-patient-safety-day-goals-2020-21	Guidance	Centers for Disease Control and Prevention	The purpose of this guidance is to: • Identify the sources of occupational stress, • Identify the adverse health effects of occupational stress, and • Recommend work practices to reduce occupational stress.	English, Spanish	Free
24	Safe working environment for health workers	A Guide to Promoting Health Care Workforce Well-Being During and After the COVID-19 Pandemic	Only available as direct pdf download	Guidance	IMI	This guide provides some advice and lessons learned to improve the well-being of the health care workforce – so that we can all look forward to a state of workers' well-being to support us to work. The guide aims to support health care leaders and workers with actionable tools for combating burnout, fatigue, and emotional distress during and after the pandemic and to align with the IMI Framework for Improving Joy in Work.	English	Free
25	Safe working environment for health workers	Reducing workplace pressure through professional empowerment	https://www.who.int/news/2020/09/16-world-patient-safety-day-goals-2020-21	Guidance	Royal Pharmaceutical Society	This document is designed to help pharmacists by empowering them, as individuals, to take action if they are adversely affected by workplace pressure. To aim to act as a resource that can enable employers and employees to address issues that lead to stress, and so to improve working conditions, productivity and most importantly public safety. This resource includes recommendations, practical guidance and advice for all parties to use in order to manage pharmacy workplace pressures.	English	6.1
26	Safe working environment for health workers	Health and wellbeing of the adult social care workforce	https://www.gov.uk/government/consultations/health-and-wellbeing-of-the-adult-social-care-workforce	Guidance	UK Gov	This guidance includes tips, advice and toolkits that employers and managers can use to help build the resilience of their social care employees who care for people with long-term health conditions.	English	Free
27	Safe working environment for health workers	Guidelines on Workplace Violence in the Health Sector	https://www.who.int/news/2019/04/04-workplace-violence-in-the-health-sector	Guidance	WHO, International Labour Office, International Council of Nurses, Public Services International	The present study reviews and analyses major known national guidelines and strategies for prevention and management of workplace violence. The purpose is to get a detailed picture of strategies implemented, a better knowledge of the available literature for employers and employees. Another objective is to obtain information on the implementation processes and the impact of the reviewed guidelines.	English	Free
28	Safe working environment for health workers	Sentinel Event Alert: Health care worker fatigue and patient safety	https://www.who.int/news/2020/09/16-world-patient-safety-day-goals-2020-21	Guidelines	The Joint Commission	While it is acknowledged that many factors contribute to fatigue, including but not limited to insufficient staffing and excessive workloads, the purpose of this Sentinel Event Alert is to address the effects and risks of an extended workday and of cumulative days of extended work. 29	Safe working environment for health workers	Guidelines for Preventing Workplace Violence for Healthcare and Social Service Workers	https://www.who.int/news/2019/04/04-workplace-violence-in-the-health-sector	Guidelines	US Department of Labour	Healthcare and social service workers face significant risks of job-related violence and it is OSHA's mission to help employers address these serious hazards. This publication updates OSHA's 1996 and 2004 voluntary guidelines for preventing workplace violence for healthcare and social service workers. OSHA's violence prevention guidelines are based on industry best practices and feedback from stakeholders, and provide recommendations for developing policies and procedures to eliminate or reduce workplace violence in a range of healthcare and social service settings. 34	Safe working environment for health workers	Involving, building and workplace violence	https://www.nursingandmidwifery.org.uk/2019/04/04-workplace-violence-in-the-health-sector	Position Statement	American Nurses Association	As stakeholders across the healthcare system recognize how violence against nurses impacts patient care, the American Nurses Association (ANA) and employers to create and sustain a culture of respect, which is built on safety, dignity, and respect for all. This includes addressing workplace violence, and all employees across the health care continuum, including nurses, have an ethical, moral, and legal responsibility to create a healthy and safe work environment for all members of the health care team, health care consumers, families,	English	Free
35	Safe working environment for health workers	"Psychological PM": Promote Health Care Workforce Mental Health and Well-Being	https://www.who.int/news/2020/09/16-world-patient-safety-day-goals-2020-21	Recommendations	IMI	IMI reviewed available evidence for interventions that can help protect staff mental health in the face of extreme working conditions such as natural disasters, terrorist attacks, and previous pandemics. We synthesized this research into evidence-based "psychological PM" recommendations for use by staff working care during the COVID-19 pandemic.	English	Free
36	Safe working environment for health workers	ACCN Standards for Establishing and Sustaining Healthy Work Environments	https://www.who.int/news/2020/09/16-world-patient-safety-day-goals-2020-21	Standards	American Association of Critical-Care Nurses	For more than 3 decades, ACCN has advocated for simplicity such as interdisciplinary collaboration and effective leadership that is essential to healthy work environments. The standards in this document extend this legacy and support the National Academy of Medicine's declaration that nurses are uniquely positioned to play an integral role in the transformation of health care. This second edition of the standards is the result of a rigorous evidence synthesis and a process that included the input of over 600 stakeholders. The literature strongly supports the tenets of the standards and highlights the urgent need for health care professionals to continue addressing these issues.	English	Free
37	Safe working environment for health workers	Protection of health and safety of health workers: checklist for healthcare facilities	https://www.who.int/news/2020/09/16-world-patient-safety-day-goals-2020-21	Tool	WHO	This checklist is the first step in identifying and prioritising areas of action for improving the protection of health and safety of health workers in line with WHO-ILO Global Framework for National Occupational Health Programmes for Health Workers. It is designed to be filled out in discussion with management, responsible officers for occupational health, environmental health, infection prevention and control, human resources and representatives of workers in the health facility. Using this checklist to begin this process will give you an overview of areas where you can propose to take action and help you determine what to prioritise. These priorities guide you in planning for improvements.	English	Free
38	Safe working environment for health workers	Supporting healthcare workers' mental health	https://www.who.int/news/2020/09/16-world-patient-safety-day-goals-2020-21	Toolkit	Mental Health At Work	A toolkit for healthcare workers about all the key principles, tools and resources for looking after your mental health.	English	Free
39	Safe working environment for health workers	Safe Place – a relaxation exercise guided by text	https://www.who.int/news/2020/09/16-world-patient-safety-day-goals-2020-21	Toolkit	WHO Regional Office for Europe	The safe place exercise is a brief imagination exercise in which you are asked to close your eyes and in your mind go to a place that is safe for you. In that you can sit or lie down and relax. It is a simple and effective way to reduce stress and anxiety.	English	Free
40	Safe working environment for health workers	Supporting the mental health and wellbeing of the health care workforce	https://www.who.int/news/2020/09/16-world-patient-safety-day-goals-2020-21	Webinar report	WHO Regional Office for Europe	The focus of this report is to share reflections, experiences and resources discussed during a three-part webinar series held by the WHO Regional Office for Europe towards the end of 2020. The focus of these webinars was to light on: • the spectrum of practical tools and interventions that have been used across the WHO European Region to support the mental health and wellbeing of the health care workforce • new ideas and approaches for countries that have not started rolling out supports, and • how tools have been integrated into the response to COVID-19 outbreaks	English	Free
